

**WRITTEN QUESTION TO THE MINISTER FOR TREASURY AND RESOURCES  
BY DEPUTY M.B. ANDREWS OF ST. HELIER NORTH  
QUESTION SUBMITTED ON MONDAY 3rd APRIL 2023  
ANSWER TO BE TABLED ON WEDNESDAY 12th APRIL 2023**

**Question**

“Will the Minister state the revenue from personal income taxation as a percentage of government revenue between 2017 and 2022 and advise how it compares with the OECD (Organisation for Economic Cooperation and Development) average?”

**Answer**

	<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>
<b>Total personal income tax (£m)</b>	428	453	475	463	558
<b>Total government revenue (£m)</b>	1,189	1,244	1,305	1,290	1,435
<b>Personal income tax as % of government revenue</b>	36.0%	36.4%	36.4%	35.9%	38.9%

The OECD annually produce a mean average of personal income tax as a percentage of total tax revenue only. Comparative analysis is not therefore possible in the terms requested.

Notes

1. Total personal tax revenue has been taken from [Government of Jersey tax receipts](#) on Gov.je.
2. Government revenue has been interpreted to mean total income of the States in the Consolidated Accounts, before gains/losses on financial assets, as reported in the Annual Report and Accounts. This is consistent with the position taken in the response to the Deputy’s previous Written Question 282/2022.
