Scrutiny Matters Feedback - Housing

Please do not build on green zone or agricultural land we have so little of it and cannot afford to lose our appeal as an attractive location by becoming 12 by 5 miles of urban sprawl.

Destroying or saving the island and its beauty is entirely in your hands.

Do everything else instead of this, tell people they have to live in charming apartments like many high density areas do rather than houses, move families and single people in with the lonely elderly, prevent immigration but I entreat you not to destroy this island and its unique beauty forever.

Great idea about using hotels, turn fort regent into a housing centre with a pool its a useless waste of land which could be turned into a lovely condominium area of apartments and facilities which will protect the country side.

Thank you
