Subject: Concerns over the planned road works and new hospital site

To whom it may concern

We fear of a severe detrimental impact that the new road works, removal of sections of the park and traffic is going to have to our business

I wish to be reassured that it will have no impact to footfall due to the noise the road works will create and the traffic that will be sure to come with it after completion

I also wish to be reassured that it will have no impact on the park where functions and festivals are held.

Green areas especially around town are deminishing at an alarming rate there will be none left before you know it.

The park is called peoples park for a reason because it was left to the people!

What is really wrong with the hospital going up Warwick farm loads of room and access with less land to acquire and less of a blot on our once pretty landscape

We just ask you listen to the people for a change
